

ELH-033

pH electrode, single-junction, gel, BNC connector SKU

- Epoxy-body housing resists impact
- Ideal for general purpose lab and field applications
- Compatible with most brands of pH meters

Specifications & Description

- The Ag/AgCl combination reference electrodes have an impact-resistant epoxy body. Electrodes provide a fast, stable response and are ideal for prolonged readings. Gel-filled design requires virtually no maintenance. 127 mm L x 12 mm diameter with maximum 176F (80C) temperature.
