

# ELH-035

## pH electrode, combination, double-junction, gel filled

- Epoxy-body housing resists impact
- Ideal for general purpose lab and field applications
- Compatible with most brands of pH meters

### Specifications & Description

- |                           |  |
|---------------------------|--|
| • Applications            | pH   |
| • Electrode Type          | Double junction  |
| • Electrode Body Material | Epoxy  |
| • Max Temperature (° C)   | 80   |
| • Connector               | BNC  |
| • Description             | pH electrode, combination, double-junction, gel filled |
