

ELH-045

Combination pH electrode, Glass, Refillable, Double-Junction, BNC

Faster response and increased stability across a pH range of 0 to 14

- Dome bulb offers better protection from breakage
- Stability in low-ionic strength solutions
- Offers resistance to Na⁺ ion interference
- Compatible with most brands of pH meters (that accept standard BNC connections)

Specifications & Description

- Glass body combination probes are able to withstand higher temperatures and chemical attack. All have 3.3 ft (1 m) long cables with BNC connectors..
